1 What are Python Packages ?

2 How can they be used ?

3 Which tools can help us ?

What are Python Packages ?

Modules

- toto.py
- toto.so
- toto/__init__.py

- toto.py
- toto.so
- toto/__init__.py

```
>>> import toto
```

```
from datetime import datetime
from pathlib import Path

def my_log(line: str, filename: Path):
    with filename.open('a') as handle:
        print(f'{datetime.now()}: {line}', file=handle)

if __name__ == '__main__':
    log_file = Path('/tmp/log.txt')
    my_log("test string", log_file)
```

```
toto/
├── __init__.py
├── robot.py
├── settings.py
├── simulation.py
└── user_interface.py
```

What are Python Packages ?

```
toto/
├── __init__.py
├── robot.py
├── settings.py
├── simulation.py
└── user_interface.py
```

```
>>> import toto.user_interface
```

```
toto/
├── __init__.py
├── robot.py
└── sensors/
    ├── camera.py
    ├── imu.py
    └── __init__.py
├── settings.py
└── simulation.py
└── user_interface.py
```

```
toto/
├── __init__.py
├── robot.py
└── sensors/
    ├── camera.py
    ├── imu.py
    └── __init__.py
├── settings.py
└── simulation.py
└── user_interface.py

>>> import toto.sensors.imu
```

don't

```
from settings import ROBOT_SIZE
```

don't

```
from settings import ROBOT_SIZE
```

do

```
from toto.settings import ROBOT_SIZE
# or
from .settings import ROBOT_SIZE
```

don't

```
from settings import ROBOT_SIZE
```

do

```
from toto.settings import ROBOT_SIZE
```

```
# or
```

```
from .settings import ROBOT_SIZE
```

```
# or
```

```
import toto # or import toto.settings  
toto.settings.ROBOT_SIZE
```

Imports (continued)

don't

```
from .robot import *
```

Imports (continued)

don't

```
from .robot import *
```

do

```
from .robot import start, stop, turn, jump
# or
import .robot as rb
```

How can they be used ?

```
In [1]: import sys
```

```
In [2]: sys.path
```

```
Out[2]:
```

```
['/usr/lib/python38.zip',
 '/usr/lib/python3.8',
 '/usr/lib/python3.8/lib-dynload',
 '',
 '/home/user/.local/lib/python3.8/site-packages',
 '/usr/local/lib/python3.8/dist-packages',
 '/usr/lib/python3/dist-packages']
```

```
In [1]: import sys
```

```
In [2]: sys.path
```

```
Out[2]:
```

```
['/usr/lib/python38.zip',
 '/usr/lib/python3.8',
 '/usr/lib/python3.8/lib-dynload',
 '',
 '/home/user/.local/lib/python3.8/site-packages',
 '/usr/local/lib/python3.8/dist-packages',
 '/usr/lib/python3/dist-packages']
```

[https://docs.python.org/3/library/site:](https://docs.python.org/3/library/site)

sys.prefix + 'lib/pythonX.Y/site-packages'

```
$ SP="lib/python3.8/site-packages"  
$ export PYTHONPATH=/opt/openrobots/${SP}  
$ # or  
$ echo /opt/openrobots/${SP} > ~/.local/${SP}/my.pth
```

How can they be used ?

```
$ sudo apt install python3-numpy  
$ dpkg -L python3-numpy
```

...

/usr/lib/python3/dist-packages/numpy/__init__.py

...

How can they be used ?

```
$ sudo apt install python3-numpy  
$ dpkg -L python3-numpy
```

...

/usr/lib/python3/dist-packages/numpy/__init__.py

...

- Works out of the box
- Intended package for:
 - your system's other applications
 - any other user of your system

don't

```
$ sudo pip install --upgrade numpy
```

...

```
Installing collected packages: numpy
```

```
Attempting uninstall: numpy
```

```
  Found existing installation: numpy 1.17.4
```

```
  Not uninstalling numpy at /usr/lib/python3/dist-
```

```
  Can't uninstall 'numpy'. No files were found to
```

```
Successfully installed numpy-1.21.2
```

```
>>> import numpy
```

```
>>> numpy.__version__
```

```
'1.21.2'
```

```
>>> numpy.__file__
```

```
'/usr/local/lib/python3.8/dist-packages/numpy/...'
```

How can they be used ?

do

```
$ python -m pip install --user --upgrade numpy
```

...

```
Installing collected packages: numpy
Successfully installed numpy-1.21.2
```

```
>>> import numpy
```

```
>>> numpy.__version__
```

```
'1.21.2'
```

```
>>> numpy.__file__
```

```
'/home/user/.local/lib/python3.8/site-packages/...'
```

How can they be used ?

With a `setup.py`:

```
from setuptools import setup

setup(
    name="toto",
    version="1.0.0",
    packages=["toto"],
)
```

How can they be used ?

pip (continued)

Local path

```
$ python -m pip install --user .
```

How can they be used ?

Local path

```
$ python -m pip install --user .
```

Editable path

```
$ python -m pip install --user --editable .
```

How can they be used ?

Local path

```
$ python -m pip install --user .
```

Editable path

```
$ python -m pip install --user --editable .
```

VCS URL

```
$ python -m pip install --user \
'git+https://github.com/psf/black#egg=black'
```

How can they be used ?

Which tools can help us ?

requirements.txt

```
$ cat requirements.txt
```

```
numpy>=1.16
```

```
quadprog==0.1.7
```

```
requests
```

```
tqdm
```

```
python -m pip install --user -r requirements.txt
```

```
$ cat requirements.in
django<4
$ python -m pip install --user pip-tools
$ pip-compile
```

Which tools can help us ?

```
$ cat requirements.txt
#
# This file is autogenerated by pip-compile with pytho
# To update, run:
#
#     pip-compile
#
asgiref==3.4.1
    # via django
django==3.2.9
    # via -r requirements.in
pytz==2021.3
    # via django
sqlparse==0.4.2
    # via django
```

Which tools can help us ?

```
$ python -m venv ~/my_v_env
```

```
$ python -m venv ~/my_v_env
```

```
~/my_v_env/
├── bin/
│   ├── activate
│   ├── pip
│   └── python -> /usr/bin/python3
├── include/
└── lib/
    └── python3.8/
        └── site-packages/
            ├── pip/
            └── setuptools/
└── pyvenv.cfg
```

Which tools can help us ?

virtualenv (continued)

```
$ . ~/my_v_env/bin/activate  
(my_v_env) $ which python  
/home/user/my_v_env/bin/python
```

In [1]: `import sys`

In [2]: `sys.path`

Out[2]:

```
['/home/user/my_v_env/bin',  
 '/usr/lib/python38.zip',  
 '/usr/lib/python3.8',  
 '/usr/lib/python3.8/lib-dynload',  
 '',  
 '/home/user/my_v_env/lib/python3.8/site-packages',  
 '/home/user/.ipython']
```

Which tools can help us ?

- mkvirtualenv
- workon
- deactivate
- .venv file
- mktmpenv

Which tools can help us ?

- mkvirtualenv
- workon
- deactivate
- .venv file
- mktmpenv

virtualfish

Which tools can help us ?

Python Development Workflow for Humans

— Kenneth Reitz

- pip w/ version pinning
- virtualenv w/ wrapper

Which tools can help us ?

- pip w/ version pinning (like Pipenv)
- virtualenv w/ wrapper (like Pipenv)
- with replacement for `setup.py` / `setup.cfg`
- with better handling of versions
- without Kenneth Reitz

Which tools can help us ?

The World's Most Popular Data Science Platform

— <https://www.anaconda.com/>

- a separate package format
- a separate package repository (condaforge)
- a separate package manager (conda)
- incompatible with everything else you already have

The World's Most Popular Data Science Platform

— <https://www.anaconda.com/>

- a separate package format
- a separate package repository (condaforge)
- a separate package manager (conda)
- incompatible with everything else you already have
- with commercial support

My recommandations

- 1 sudo apt install python3-toto
- 2 python -m pip install --user --upgrade toto

Which tools can help us ?

My recommandations

- 1 sudo apt install python3-toto
- 2 python -m pip install --user --upgrade toto
- 3 python -m venv venv

Which tools can help us ?

My recommandations

- 1 sudo apt install python3-toto
- 2 python -m pip install --user --upgrade toto
- 3 python -m venv venv
- 4 poetry
